

SHERNAN JAVIER

Toronto, ON | shernanjavier@gmail.com | shernanjavier.com | github.com/ShernanJ | linkedin.com/in/shernanjavier

EXPERIENCE

Founding Engineer

Stealth Startup

Dec 2025 – Feb 2026

Remote

- Developed a behavioral intelligence platform with **browser SDK** capturing real-time user signals
- Designed **streaming pipelines** transforming events into structured behavioural profiles
- Implemented **inference layers** powering adaptive campaign optimization

Co-Founder & CTO

MerchMe — UGC Creator Marketplace

Jun 2025 – Dec 2025

Toronto, ON

- Launched live creator–brand **marketplace** (merchme.me) enabling campaign-based UGC collaborations
- Designed automated **matching engine** and campaign workflows
- Supported **100+ creators** across 5+ active brands

Founding Engineer

Clover Labs

Apr 2025 – Oct 2025

Toronto, ON

- Built **Playwright scraping pipelines** across social platforms to analyze viral content
- Extracted growth hooks, formats, and distribution signals from high-performing videos
- Automated content replication and distribution experiments to **systematically test viral growth mechanics**

Software Engineer Intern

TD Bank (Multiple Internships)

May 2022 – Apr 2024

Toronto, ON

- Built production automation pipelines increasing mortgage lead intake by 50+ qualified leads per day
- Designed and shipped internal UI SDK powering design system adoption across TD development teams
- Delivered production teller dashboard replacing legacy in-branch systems

Software Engineer Intern

Thales — Digital Identity & Security

Sep 2023 – Dec 2023

Burlington, ON

- Built inventory automation across 20+ global facilities, saving \$100K+ in costs

Software Engineer Intern

Taplytics (YC W14 → DevCycle)

Jun 2021 – Sep 2021

Toronto, ON

- Built experiment-driven web surfaces supporting growth and acquisition funnels

PROJECTS

Xpo — Ghostwriting and Research Agent for X/Twitter

- Built **multi-agent orchestration architecture** to autonomously research topics and generate contextual drafts
- Implemented **auth-token load balancing** to dynamically swap CSRF credentials and bypass X scraping throttles
- Designed **inference pipelines** to analyze and seamlessly replicate the user's specific writing style

Brand/Creator Compatibility Engine — Creator Partnership Intelligence Platform

- Built automated **brand ingestion pipeline** scraping live websites into structured company profiles
- Implemented deterministic **creator matching engine** using niche and engagement signals
- Built distributed **Playwright crawling workers** orchestrated with **BullMQ** for creator ingestion from unstructured sources

ENSight — Wallet Safety Browser Extension

- Intercepted **blockchain provider calls** in Chrome extension for real-time transaction analysis
- Structured raw wallet interactions into semantic intent events
- **Streamed real-time events into background workers** for enrichment and risk analysis

SKILLS

Languages: TypeScript, Python, Java, SQL

Frontend: React, Next.js, Tailwind, Chrome Extensions

Backend & Systems: REST APIs, BullMQ, event pipelines, microservices

Data: PostgreSQL, Redis, Supabase

Automation: Playwright, browser automation, scraping

Infrastructure: Docker, cloud platforms

EDUCATION

Sheridan College

Software Development and Network Engineering

2019

Oakville, ON
